

Mow Down Air Pollution!

Subject Line: Now's your chance... Help us "Mow Down Air Pollution!"

Mow Down Air Pollution!

On summer's hottest days, emissions from motor vehicles, gasoline engines like lawnmowers, fumes from paints, solvents and industrial operations photo-chemically react in the presence of sunlight to create ground-level or "bad" ozone.

To help fight this pesky and harmful pollutant, consider using commute alternatives like carpooling, walking, riding the bus, vanpooling or bicycling and make the switch to electric or manual-powered lawn and garden equipment. Plus, when you use a commute alternative 5X or more, track it on MyCommute.org you'll automatically be entered to **WIN 1 of 9 prizes for a \$50 and 8 \$25 gift cards!**

Spokane Clean Air would also like to help by giving away one (1) Husqvarna Electric Lawn Mower, valued at \$539. The contest runs July 1 – August 31, 2018. To enter, go to SpokaneCleanAir.org and complete an entry form.

For more information on commute alternatives, how they benefit you, our air and which one might be right for you contact me **<name>**, your ETC at **<number>**. You can also visit SpokaneCleanAir.org for additional air quality tips to help you "Mow Down Air Pollution!"

A special thank you to Country Homes Power for donating the Husqvarna Electric Lawn Mower.

Subject Line: Wondering how else you can "Mow Down Air Pollution" this summer?

It's as easy as your commute.

Your commute habits can help reduce ozone-forming vapors. Here's how:

- **Drive less.** Use commute alternatives, combine errands or share rides with family and friends, and bike or walk for short trips. This means fewer cars on the road and fewer trips to the gas station to fill-up. This helps reduce traffic congestion, fuel consumption, helps our air and your pocketbook!
- **Avoid overfilling or "topping off" the gas tank.** Stopping at the first "click" and you'll save gas and money by reducing spills and preventing gas vapors from escaping into the air.
- **Refuel your vehicle after 6 pm.** To keep ozone forming vapors out of the air during the heat of the day, refuel your vehicle after 6 pm.

And when you use a commute alternative 5X and track it on MyCommute.org you'll automatically be entered to **WIN 1 of 9 prizes for a \$50 and 8 \$25 gift cards.** Don't forget to enter to win a Husqvarna Electric Lawn Mower, valued at \$539. The contest runs July 1 – August 31, 2018. To enter, go to SpokaneCleanAir.org and complete an entry form.

To learn more about commute alternatives or for more information on how you can WIN contact me **<name>**, your ETC at **<number>**.
